

Abrasive Band Grinder

iGrind-868 Abrasive band grinder was designed and manufactured according to the internationally advanced sample method, which uses the sander belt to polish so that we can change different size of the belt sander freely in accordance with requirements at random.

It can replace the grinding machine, pre-polishing machine, handy sandpaper so that each belt need just 1-2minutes to complete the operation. If spectrum samples in the spectrum is polished, we can not only save time and manpower but also save a lot of belts , as well as make sure safty, reduce the cost and make sure quality and increase the efficiency.

The machines apply to the enterprises, metallurgical industries as well as Materials R&D testing center, metallographic testing room and spetrum rooms and so.

iGrind-868

iGrind-867

Specifications:

Product Name	Abrasive Band Grinder Machine (Double Abrasive Band)	Abrasive Band Grinder (Single Abrasive Band)
Model	iGrind-868	iGrind-867
Rooler's center	255mm	255mm
System	Water-cooling system and dust-collectiong system	Water-cooling system and dust-collectiong system
Abrasive band	width 100mm, long 920 mm	width 100mm, long 920 mm
Rotation speed	1400rpm	1400rpm
Surface Speed	768m/min	768m/min
Power supply	550W / 380 V / 50Hz	550W/380 V / 50Hz
Dimension	550×600×310mm	550×600×310mm
Weight	85Kg	70Kg
